

2008 Cotton Replant Refund Guidelines

Any field planted first with Americot or NexGen cotton and replanted with an Americot or NexGen variety in the same season is eligible for 100% reimbursement of the suggested retail price of the originally planted seed.

Farmers seeking a Replant Refund should contact Americot before tilling or replanting any fields associated with a Replant Refund request. On-site verification and documentation by an Americot Representative must be completed prior to replanting in order to be eligible for free replant seed.

Following verification of replanting with Americot or NexGen brand seed, Americot will issue a refund check to the farmer and seed supplier. A check in the amount of the suggested retail price for units necessary to replant will be issued, but may not exceed quantity used to plant the failed or lost stand.

Americot makes no warranty or guarantee regarding availability of specific varieties for replanting purposes. *If the original-planted variety is not available another Americot or NexGen brand cotton variety must be substituted for replanting purposes in order for farmer to be eligible to receive a Replant Refund on the replanted units.*

Recipients of free replant seed under the terms of this program are responsible for the payment of any and all technology fees associated with the free seed received.

Claims must be submitted to Americot no later than July 15, 2008. Program will be discontinued thereafter.
