2011 Dryland Drought Relief Program

All-Tex Seed is pleased to announce the 2011 Drought Relief program for cotton grown in West Texas, East Texas New Mexico, Oklahoma, and Kansas (seed drop zone D, E) for the 2011 growing season.

This offer will support a grower's decision to plant high quality All-Tex Seed cotton seed containing advanced technologies that help achieve the best yields possible. The All-Tex Seed program will also aid in reducing financial risk from crop loss due to drought when choosing the following products.

*** All-Tex B2RF, RF varieties***

All-Tex Seed

Dryland Drought Relief Program for Seed Drop Zone E and D

To Qualify:

In the event of a dryland drought, a grower whose cotton crop is lost or yields less than 150 lbs. of lint per acre will qualify if due to drought.

Grower Refund:

50% of suggested retail price will be refunded for **All-Tex B2RF and RF** cottons.

The Dryland Drought Relief Program applies only to crop losses and/or specified yield reductions incurred due to drought. Losses or yield reductions due to other conditions or perils such as diseases, pests, hail, wind, high wind etc, are not eligible for this offer.

A claim must include Federal Crop Insurance documentation, which verifies drought as the reason for the claimed acres yielding less than 150 pounds of lint/planted acre.

For details on the Cotton Technologies Drought Relief Program refer to Monsanto's 2011 Roundup Rewards® Brochure.

Claim forms may be downloaded from All-Tex's website.

Claims must be submitted to All-Tex Seed no later than January 15, 2012.

Program will be discontinued thereafter.

A potential claim must include FSA 576, Insurance production work sheet, Purchase invoices; (No Insurance or harvested) must provide FSA form 503.
