2011 Innovation Plus Shared Risk Programs

Cotton Seed Replant and Crop Loss West Region

2011 Shared Risk Programs for FiberMax® and Stoneville® cotton seeds, LibertyLink® and GlyTol® Technology, Temik® insecticide/nematicide, Gaucho® 600 insecticide, Aeris® insecticide/nematicide seed treatment, Trilex® Advanced Seed Applied System, Stance® plant regulator and Ignite® herbicide

PROGRAM OBJECTIVE

To encourage use of Best Management Practices and to share in grower risk of replanting Bayer CropScience cotton seed brands or losing their final cotton planting, due to certain weather events, as described in the program elements section below, by offering options to compensate for: 1) replanting with FiberMax and/or Stoneville seed or 2) re-treating cotton seed varieties originally treated with Temik, Aeris, Gaucho 600 and/or Trilex Advanced or 3) if applicable, addressing crop loss for LibertyLink® and/or GlyTol® Technology and for using Ignite on LibertyLink cotton and Stance on FiberMax and/or Stoneville cotton.

QUALIFYING PRODUCTS	ACTIVITY	SHARED RISK COVERAGE
Replant – 100% Bayer Cotton Seed and At Plant Products		
<ul style="list-style-type: none"> • Stoneville Cotton Seed • FiberMax Cotton Seed • LibertyLink Technology • GlyTol Technology • Aeris • Trilex Advanced 	First Replant Only	100% of Suggested Grower Price
<ul style="list-style-type: none"> • Temik • Gaucho 600 	First Replant Only	100% of Grower Invoice Price
Crop Loss		
<ul style="list-style-type: none"> • LibertyLink Technology • GlyTol Technology 	Crop Loss	Reimburse grower for LibertyLink and/or GlyTol Technology Fee
<ul style="list-style-type: none"> • Ignite 		100% Grower Invoice Price up to 58 ounces per applied acre
<ul style="list-style-type: none"> • Stance 		100% Grower Invoice Price

REPLANT & CROP LOSS

Replant Program Dates and Geography:

Products Included:

FiberMax and Stoneville and LibertyLink and GlyTol Technology, Temik, Gaucho 600, Aeris, and/or Trilex Advanced

- South Texas (South of I-10): Through May 15, 2011
- California and Arizona and Remaining Southwest Geography: Through July 1, 2011

Crop Loss Program Dates:

FiberMax and Stoneville cotton seed, GlyTol and LibertyLink Technology, and Ignite Herbicide:

- California and Arizona: through August 10, 2011
- South Texas (Geography South of I-10): Through July 31, 2011
- Remaining Southwest Geography: Through August 31, 2011

Stance applied to FiberMax and/or Stoneville cotton: Through November 15, 2011 (all geographies)

QUALIFYING DEALERS AND GROWERS

Cotton growers who use Qualifying Products purchased from a Bayer CropScience (BCS) authorized distributor, retailer or agent.

Payments will be released only to growers who have a valid signed Bayer CropScience Grower Trait License. (if applicable)

PROGRAM ELEMENTS

Growing Practices:

Growers must use sound farm management practices, making every attempt to establish a stand and produce a crop. Growers are encouraged to follow Right Variety. Right Field. Right Yield.™ strategy. Planting multiple varieties on their farm will increase profit potential and reduce risk.

Replant Program Requirements:

The program applies to all acres planted with FiberMax and/or Stoneville cotton seed.

An eligible cotton crop which is destroyed by an act of God; limited to wind, hail and/or flooding events only.

Loss of early season cotton stands due to soil crusting, cold temperatures, disease and insects are covered when demonstration of Best Management Practices (as established by University Extension Services for local growing region) are followed:

- Seeding Rate
- Weed Control
- Other Acceptable Farming Practices

Reimbursement (if eligible) will be made on products that are purchased and consumed in 2011. Reimbursement will not exceed cost of products used at first planting.

Cotton Seed Replant:

- If a grower who originally planted with FiberMax and/or Stoneville elects not to replant with FiberMax and/or Stoneville then grower is not eligible for program.
- If the original planted variety with the same technology is not available then another with FiberMax and/or Stoneville variety with the same technology must be substituted in order to be eligible for this program.
- This program is only offered for the first replanting of the season and does not cover multiple replant situations

At Plant Products:

- Qualifying Products must be applied according to recommended label rates. Claim reimbursement value will not exceed recommended label rates.

- **Temik Requirements**

- Purchase minimum 700lbs of Temik and apply at a rate equal to or greater than 3.5 pounds per acre.

Note: Growers who use less than 3.5 pounds per acre are not eligible for reimbursement of Temik.

- **Gaucho 600, Aeris and/or Trilex Advanced Requirements**

- Treat FiberMax and/or Stoneville with Gaucho 600, Aeris and/or Trilex Advanced at labeled rate.
- The program applies to all acres planted with Bayer CropScience Cotton Seed and treated with Gaucho 600, Aeris and/or Trilex Advanced followed by replanting with Bayer CropScience Cotton Seed and retreatment with Gaucho 600, Aeris and/or Trilex Advanced.
- If a grower uses Temik on first planting and Gaucho 600, Aeris and/or Trilex Advanced on replant, the grower will be reimbursed up to the actual cost of the seed treatment used at replant not to exceed the grower invoice cost of the Temik used on first plant.
- If a grower plants cotton treated with Gaucho 600, Aeris and/or Trilex Advanced and uses Temik on the replanting, the grower will be reimbursed up to the actual cost of the Temik, not to exceed the suggested grower price of the seed treatment used on first planting.
- If a grower first plants with cotton treated with Gaucho 600, Aeris and/or Trilex Advanced in combination with Temik, the grower will be reimbursed up to the cost of both.

Crop Loss

Program Requirements

If grower's cotton crop is lost and is destroyed and cannot be replanted, the Bayer CropScience Shared Risk Crop Loss program protects grower's investment on LibertyLink and/or GlyTol Technology, Ignite and/or Stance.

- Crop Loss as a result of drought is covered.
- Failed acres must also qualify for coverage under the Multiple Peril Crop Insurance Program.

Stance Plant Regulator Requirements:

- Stance reimbursement covers growers who treat at least 100 acres of FiberMax and/or Stoneville cotton seed with a minimum of two (2) applications of at least two (2) ounce of Stance per acre.
- Stance crop loss coverage is extended through November 15, 2011.

LibertyLink and/or GlyTol Technology and Ignite Requirements:

- If a grower's eligible cotton crop is damaged, as described under general program requirements above, to the extent that it qualifies for crop loss, then Bayer CropScience will reimburse the grower for the LibertyLink and/or GlyTol technology fee portion of the seed price.
- Only LibertyLink and/or GlyTol varieties are eligible.
- Affected acres cannot be replanted back to cotton and must be destroyed prior to harvest and before:
 - July 10, 2011 (South Texas)
 - August 10, 2011 (California and Arizona)
 - August 31, 2011 Remaining West Geography
- Ignite reimbursement up to use rate of 58 ounces of Ignite per acre - minimum purchase and application of 20 gallons of Ignite in 2011.

PROGRAM PROCEDURES

- Growers must notify the seed dealer, from whom the seed was purchased, of the shared risk claim.
- For crop loss, the seed dealer will contact the local Bayer CropScience Sales Representative within 10 days of the crop loss. Bayer CropScience shall be the final arbiter as to the cause of loss.
- For replant, the seed dealer will contact the local Bayer CropScience Sales Representative prior to replant.
- Bayer CropScience Sales Representatives must submit within 2 weeks subsequent to Replant and Crop Loss dates (see p. 3 of program for submittal dates by region).
- Bayer CropScience Sales Representative will verify the need for replant or crop loss reimbursement.
- Bayer CropScience representative must inspect the field prior to tillage or replanting.
- All Qualifying Product purchase information must be supplied to the Bayer CropScience Sales Representative for: (1) First and, if applicable, the second planting of FiberMax and/or Stoneville purchases and (2) If used, receipts for first and second planting (applications) of Temik, Gaucho 600, Aeris, Trilex Advanced, Stance and/or Ignite.
- Claim reimbursement will be mailed to the Bayer CropScience Sales Representative, delivered to the seed dealer and made payable to the grower.
- Claims will be audited.
- Growers who plant FiberMax and/or Stoneville with Monsanto technology, e.g. Genuity® Bollgard® II and/or Roundup Ready® Flex traits, may qualify for additional rebates. Contact Monsanto for program details.
- This program applies to Bayer CropScience Products and technology fees only. Any technology fees associated with Monsanto technology traits are payable as outlined by Monsanto program(s) regardless of replanting or crop loss unless otherwise stated by Monsanto.

Conditions:

BAYER CROPSCIENCE (BCS) RESERVES THE RIGHT TO MODIFY OR WITHDRAW THIS PROGRAM OR ANY PORTION THEREOF WITHOUT PRIOR NOTICE.

Reimbursement will not be made on invoices that have been artificially inflated or fabricated. Bayer CropScience makes no warranty or guarantee regarding availability of Qualifying Products including specific varieties of product for replanting purposes. All federal, state or local taxes on payments received under this program are the sole responsibility of the payment recipient, individuals, or reseller, and not of Bayer CropScience, its parent company, or its agents. Fraudulent reporting of sales and product use are grounds for withholding or invalidating all program money. Bayer CropScience reserves the right to verify all claims for allowances under this program, and in matters of discrepancy, reserves the right of final decision. Bayer CropScience reserves the right to debit payments from future programs or collect amounts directly from growers if errors are discovered after payments have been issued.
