

FIELD DAY

Thurs., Aug. 25
Tour Start 9:00am, Noon Lunch

Fri., Aug. 26
Noon Lunch, 1:30pm Tour Start

ENLIST SYSTEM DEMOS

See how you can successfully use the Enlist™ system on your West Texas farm, and learn the benefits of PhytoGen® cottonseed with the Enlist cotton trait. Walk a commercial field where Enlist® herbicides deliver on-target application. You'll also see:

- Drift minimization demonstration from an application using commercial-size equipment
- 'Lack of volatility' demo
- Nozzle selection demo

VARIETY TRIAL

See top yielders from University and Extension trials across Texas that are proven to work on West Texas farms. These varieties deliver leading yield protection to help protect your farm's bottom line.

NEW TRAIT PACKAGE

See the cotton industry's latest trait stack, the W3E1 cotton trait package, which offers tolerance to 2,4-D and glufosinate, for use with Enlist One herbicide. Learn how this new trait package can fit on local farms and about the program approach to manage this new trait.
